codger, and her uncle as well, I think they would have embarrassed me at times. We had been to the Thanksgiving matinee at the op-It was the inevitable "Faust," and Gounod's

ovely maste still rang in our cars as we hurried up the steps of the elevated rall-road staffon at Ferty second street on our way home. We looked back for a moment at the eager crowd as we mounted the long flight. Then we were pushed on by a sudden movement of the throng toward the station platform. There was a rush, a hissing of steam, a creaking of iron, a clanking of gates swung wide, a hoarse ery from the guard, and we found ourure seekers irresistibly into a car already well filled. We were separated for a min-ute, and when I looked back I saw Janet nodding her thanks to an old figure of a man as she sank into a seat. Perhaps I should not say odd, for nothing is odd in New York, where all nations and all classes and conditions of men meet in the

elevated railroad train on an equal foot-ing. But the figure was a little singular in that it was not a New York figure.

The ruddy health in the boylsh face was not the product of New York air, the square cut, awkward coat and the shapeless felt but were unmistakably bought at a "general store," where molasses and seed corn were leading commodities. The thick shingled hair might have been cut to

the measure of a chopping bowl. The fig-ure was bucolle—there was no mistaking it. I made my way to Janet's side and turned to thank her benefactor. Just then some one left the adjoining seat vacant, and, with the feeling that reciprocal kindness was the best evidence of appreciation, I pressed the stranger into it, much

yor would resent the suggestion, but the tactful tone and the pleasant smile dis-armed resentment. The youth went to the other extreme. The ruidy check flush-ed a deeper red, but not with smbarrass-

ment.
"No, I'm from the country," he said frankly. "I haven't been here more than frankly. "I haven't been here more than a day or two. I couldn't let a woman stand up and I sit here. Standing's pretty easy for a man unless he's been walking all day."

There was something personal in the last sentence that led me to think that the young countryman had been walking a

great deal that day.
"I never was in New York before," he esid. "I have come from a little town in the west to see if I can learn a little more and do a little more perhaps in a big town than I can in our little one. We haven't many chances there, and there's so much here—the libraries and there's so much here—the libraries and the schools and ev-erything. You'd think I was pretty hig to go to school, wouldn't you' But I think a man's never too old to go to school if there's anything to learn."

pleasant interest, he plunged into deeper confidences. He told of the little town was a recital. It came to an end just before we reached our station.

"This is where I get off," said Janet,
"I'm afraid I've been telling you a lot that doesn't interest you," said the young man, scarlet of face again.

"It interests me very much," said Janet with a sincere smile. "I believe in the fellowship of man. I hope that you may find all that you hope for here. Goodby." She turned and nodded, smiling to him as we left the car. He was looking after us, hat in hand, seemingly forgetful of his surroundings, as I glanced back from the station platform.

I never thought to see the face or the figure again. The encounter with them, though, came very naturally. I went to the Lenox library to consult an authority

"THIS IS WHERE I GET OFF," SAID JANET. a few days later, and there was the young man of the elevated railroad, looking at the rare manuscripts in their glass cases the rare manuscripts in their glass cases, not understanding, I know, but impressed by the inscriptions which told of their age. He glanced up from one of them as I passed, and a quick look of recognition came into his eyes. Somehow the spirit of followship of which Janet had given me such a good avancial. a good example led me to stop and speak to the youth. If I had encountered him alone the first time, even if we had struck up a conversation as he and Janet had done, I should have passed him afterward with a nod at most, but the fact that Janet had taken an interest in his welfare and talked to me about it as we walked toward her home led me to stop and say

word to the stranger. So I asked him how he was and how he was getting on. how he was and how he was getting on.

He was well, he said, but he had not got on very far—in fact, he had had nothing to do but look at the sights. There was no work to be had and in one sense he was still lide. But he was on the look-out, and where a roan was that to make was still life. But he was on the out, and where a man wanted to work there was pretty sure to be work for him to do somewhere, he thought. The unconscious influence of Janet was on me again when I suggested that he call at my office the next day to discuss the kind of work he wanted with a view to consid-ering whether I knew of any position which he could fill. He promised to come,

and I went on my way.

I had put him quite out of my thoughts

It was nearly 12 o'clock when the janitor let me into the building. I climbed the stairs to my office floor. There was a light in the outer of-fice. "That's stupid of Johnson," I said to myself. "He has left the gas burning." But, when I opened the door, there sat Jacob, poring over a call bound volume. He looked embarrassed when he saw me.

"You're not likely to get much sleep at this rate." I replied. "Do you stay up as late as this very often?"

"Almost every night," he answered.

Jacob served three years in my office. By that time he was prepared to pass a very creditable examination for admission to the bar. I had reported his progress to Janet from time to time and had received her thanks for my consideration, but it was not on her account now that I was encouraging Jacob, He carned all the consideration he received. He had had only two brief vacations to visit his home and the remainder of the time he had de voted unremittingly to study and to the work which I had given him. He could do the work of any two or three of the clerks in the office, or in the building, for that matter. The term of his experience in New York had done him a world of good. His mental equipment had been improved, of course, but his dress and manner had improved no less. All of the bucolic air had disap-peared. He was not extravagant in anything. He had no money with which to be extravagant, for the surplus of his lit-tle wages had been sent regularly to his mother. But he found that he could buy clothing of modern cut in New York quite as cheap as he could purchase the old style garments of his boyhood in the little town from which he had come, and ocasionally he found an extra job of work. which he did in hours stolen from sleep,

What Shall We Do.

A serious and dangerous disease prevails o this country, dangerous because so deceptive. It comes on so slowly yet surely that it

is often firmly seated before we are aware of it. The name of this disease which may be ivided into three distinct stages is, First, Kidney trouble, indicated by pain in the back, rheumatism, lumbago, frequent desire to urinate often with a burning sensation, the flow of urine being copious or scant with elevator strong odor.

If allowed to advance, this reaches the Second stage, or Bladder trouble, with heavy pain in the abdomen low down between the navel and the water passage, increasing desire to urinate, with scalding sensation in passing, small quantities being passed with difficulty, sometimes necessary to draw it with instruments. If uric acid or gravel has formed, it will prove dangerous if neglected.

The Third stage is Bright's Disease. There is comfort in knowing that Dr. Kilmer, the great kidney and bladder specialist, has discovered a Remedy famous for its marvelous cures of the most distressing cases and known as Dr. Kilmer's Swamp-

Dr. Miles' Nervine Restores Health. The following was told by Lord de Ros: In the early part of the century Vauxhall was the resort of many respectable per-sons, especially of those who came up from the country to see London sights. During one season it was infested by a band of roughs, who made it their occupation to insuit and molest the most quiet, decent people, especially any whom they guessed to be country visitors. They became such a nuisance that several men about town, among whom were Lord Alvanley and Keppel Craven, laid a plot to get rid of They hired Mendoza, the famous prize fighter, and dressed him up as a dean, with a shovel hat and apron.
